

3 nasty facts about the clothing industry...

1. It takes about one-third of a pound of pesticides and fertilizers to grow enough conventional cotton for just one t-shirt.
2. Every piece of clothing made contains formaldehyde, caustic soda, sulfuric acid, urea resins, sulfonamides, halogens, bromines unless dyed using certified natural dyes.
3. Over 85% of all ground water in China and Indonesia is contaminated. Most dyeing plants still emit their discharge of toxic heavy metals like Mercury and Lead into local rivers and streams.

It's time to put an end to the outdated toxic way of manufacturing...

Welcome to USTRIVE clear conscious manufacturing:

Tour Image, Inc, Jin Clothing, Care-Tex Industries and S & B Printing, four companies vertically integrated into one to create the only Global Organic Textile Standard "GOTS" and Organic Code Standard "OCS" certified chemical free clothing manufacture in North America and second in the world.

Tour Image, Inc – All things sustainable design and development company. From organic cotton and hemp fabrics, to ethical manufacturing practices, to natural dyes. Since 1992 your complete guide and resource for true ethical manufacturing.

Jin Clothing, Inc – Cut and sew facility. A private label apparel manufacturer specializing in garment dye full package programs. With over 30 years of experience at manufacturing high-quality garment from start to finish. GOTS, OCS, State and Federal Compliance factory.

Care-Tex Industries – State of art dye facility. Full-service dyeing and finishing facility specializing in regular and natural GOTS and OCS certified dyes and finishes. State and Federal Compliance factory.

S & B Screen Printing and Embroidery – Full-service printing and embroidery. Specializing in water-base printing. In-house digitizing. GOTS, OCS, State and Federal Compliance factory.
